aluminium collection

Avant is an innovative range of switches designed for those who want to combine modern design with maximum practicality. Elegant shapes, quality materials and easy operation make every press a pleasant experience.

The switch frames are made of high-quality aluminum, ensuring not only durability but also adding a light aesthetic element to every room. Available in black and white.

Switch control is available in both white and black versions, providing even greater flexibility in combination with frames.

The product range includes:

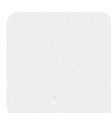

- Switches, outlets, controllers
- Data sockets

A new design series of switches and sockets that thanks to progressive processing will elevate your space to a new level and highlight the beauty of modern interiors. The main design feature is the rocker switch control, which gives the switches a sophisticated look while allowing convenient and intuitive control of lights.
